

Weekly Progress Report – Week 02

Name: Nitish Kumar

Roll No.: _____

Department: B.Tech CSE

Project Title: _____

Week: 02

Duration: _____

1. Objectives of the Week

Begin implementation of core modules, design the database, develop the initial UI, and test basic functionality.

2. Activities Completed

Implemented the first module, created the database schema, designed basic UI screens, integrated frontend and backend, and performed initial testing with bug fixes.

3. Milestones Achieved

Core development started, database connectivity established, basic interface completed, and initial features verified.

4. Challenges Faced

Frontend-backend integration issues, database connection errors, and debugging application flow.

5. Solutions Implemented

Corrected configurations, fixed SQL queries, and used systematic debugging to resolve issues.

6. Lessons Learned

Improved database integration, debugging skills, frontend-backend integration, and understanding of continuous testing.

7. Plan for Next Week

Develop more features, improve UI responsiveness, perform module testing, and optimize the application.

8. Remarks

Week 02 focused on implementing the project's core functionality, integrating components, and testing initial features. Overall progress was satisfactory.
