

Weekly Progress Report - Week 04

Name: Nitish Kumar

Project Activities

Worked on project planning and requirement analysis. Implemented core features and tested existing modules. Fixed minor bugs and improved code structure. Documented progress and updated project repository.

Challenges and Hurdles

Faced integration issues and debugging challenges. Resolved them by reviewing documentation, testing modules individually, and consulting online resources.

Lessons Learned

Improved debugging skills, gained better understanding of project architecture, and learned the importance of planning, documentation, and systematic testing.
